>>> **Cross Match Technologies, Inc. Becomes First to Respond to U.S. Government's Challenge**

Cross Match Technologies, Inc., a leading global provider of high-quality interoperable biometric identity applications and solutions, announced the release of L SCAN Guardian, a ten-print livescan hardware and software system that sets a new standard for speed, weight, mobility and functionality. Measuring 6 inches wide, 6 inches deep, and 4.7 inches high, and weighing only four pounds, Guardian addresses the mandatory physical and performance requirements specified in the federal government's Challenge to Industry issued in September 2005. The Guardian automatically captures and segments an individual's ten-print images, evaluates the image quality of each fingerprint image, displays on a computer screen the fingerprint images, and formats the captured data into FBI compliant electronic fingerprint transaction records, all in less than 15 seconds.

>>> **SafeBoot expandeds USB security devices with three new USB**

Silhouette is a USB device featuring fingerprint authentication, Phantom is a driverless and zero-footprint USB device, whereas Rhino is a driverless, zero-

footprint external hard disk drive. What's so neat about the devices is Safe-Boot's encryption which makes the info stored on memory sticks unusable for anyone without the proper authorization in the event of loss or theft. This makes the USB devices suited for environments with strong demands on data security.
