New CEO for Biometric Identity Solutions Provider Cross Match Technologies - 1st March, 2011

Companies referenced in this item: [Cross Match Technologies](#)

David Buckley is the new President and Chief Executive Officer at Cross Match, the announcement came today from Cross Match Chairman of the Board, Don Nickelson.

At Safran Group Mr. Buckley was CEO of Vectronix Inc., responsible for advanced systems designed for the military and first responders, growing the company quickly from a reseller to a full integrator of mission-critical solutions for the military.

"Mr. Buckley has an exceptional background that will be invaluable as he leads our company through the dynamic changes in the biometrics arena and as we continue to grow our solutions business," says Don Nickelson, "We welcome him to Cross Match with great pleasure and anticipation."

Prior to joining the private sector Mr. Buckley was a US Navy Surface Warfare Officer with duties as an engineering officer and a combat systems officer, serving in the Gulf War, Panama and counter-narcotics operations in the Caribbean.

Mr. Buckley holds Masters in Business Administration from the Wharton School of Business where he studied operational management, at the United States Naval Academy where he earned a Bachelor of Science degree his focus was optical physics. Mr. Buckley is a familiar speaker at various professional events throughout the country, active in his local community and also coaches youth football and lacrosse.

Cross Match Technologies, Inc. is a leading global provider of biometric identity management systems, applications and enabling technologies to governments, law enforcement agencies and businesses around the world. These solutions are used to capture and process the unique physical characteristics of individuals to establish and verify their identities. Offerings include multiple biometric technologies capable of wireless, mobile or stationary use that encompass fingerprint, palm and full-hand scanners, facial recognition systems, iris scanning technology, document readers, biometric software, and related services.
