## Cross Match Names David Buckley as President and CEO

Published: Tuesday, 1 Mar 2011 | 12:52 PM ET

Text Size - +

PALM BEACH GARDENS, Fla., Mar 01, 2011 (BUSINESS WIRE) -- Cross Match Technologies, Inc., a global provider of biometric identity solutions, announced today that David Buckley has been named the company's President and Chief Executive Officer.

Most recently, Mr. Buckley was the CEO of Vectronix Incorporated, a Safran Group company and leader in optronics and advanced systems designed for the military and first responders. Under his guidance, the company quickly grew from a small reseller of quality products to a full integrator of mission-critical solutions for the military. Formerly, Mr. Buckley was President and CEO of Modtech Holdings and he also held senior leadership positions at General Electric Company and Price Waterhouse.

"Mr. Buckley has an exceptional background that will be invaluable as he leads our company through the dynamic changes in the biometrics arena and as we continue to grow our solutions business," says Don Nickelson, Chairman of the Board at Cross Match. "We welcome him to Cross Match with great pleasure and anticipation." Before joining the private sector, Mr. Buckley served as a Surface Warfare Officer in the U.S. Navy, as both an engineering officer and a combat systems officer. The vessels on which he served were involved in the Gulf War, Panama and counter-narcotics operations in the Caribbean.

Mr. Buckley holds a Bachelor of Science degree from the United States Naval Academy where he focused on optical physics, and a Masters in Business Administration from the Wharton School of Business where he studied operational management. Active in his local community, Mr. Buckley is a familiar speaker at various professional events throughout the country and also coaches youth football and lacrosse.

About Cross Match Technologies Cross Match Technologies, Inc. is a leading global provider of biometric identity management systems, applications and enabling technologies to governments, law enforcement agencies and businesses around the world. These solutions are used to capture and process the unique physical characteristics of individuals to establish and verify their identities. Offerings include multiple biometric technologies capable of wireless, mobile or stationary use that encompass fingerprint, palm and full-hand scanners, facial recognition systems, iris scanning technology, document readers, biometric software, and related services. ### The Death of the PC

The days of paying for costly software upgrades are numbered. The PC will soon be obsolete. And BusinessWeek reports 70% of Americans are already using the technology that will replace it. Merrill Lynch calls it "a \$160 billion tsunami." Computing giants including IBM, Yahoo!, and Amazon are racing to be the first to cash in on this PC-killing revolution.

Yet, a small group of little-known companies have a huge head start. Get the full details on these companies, and the technology that is about to destroy the PC, in a free video report from The Motley Fool.
