

## Cross Match Announces New Identity Management Products

by Phil Leggiere  
Tuesday, 23 September 2008

Cross Match Technologies Inc., a global provider of multimodal biometric identity solutions, has announced it will be introducing the D SCAN Authenticator CF, the L SCAN 500P and the Verifier Mw at the 2008 Biometrics Consortium Conference (BCC) in Tampa, Florida. These 2008 product announcements are enhanced versions of Cross Match's document reader, palm print livenesscan solution and mobile fingerprint system.

The D SCAN Authenticator CF is an enhanced version of Cross Match's single-step full-page document scanner. The L SCAN 500P is the first FBI-certified single platen device for capturing fingerprints and palm prints, and Cross Match's Verifier Mw enhances mobile identification programs for military and law enforcement agencies that need to determine subjects' identities in the field using fingerprint capture technology.
