

Multimodal Biometric Product Gains Dual Product Awards

Cross Match Technologies (published 23/06/2010)

The SEEK II multimodal biometric platform and Lookout Collector facial image collector from Cross Match gain biometrics and surveillance awards from Network Products Guide

Cross Match Technologies has announced today that Network Products Guide, an information technology research and advisory guide, has named both SEEK II and Lookout Collector as winners of the 2010 Best Products and Services Award. This respected annual award honours products and services that represent the rapidly changing needs of technology end-users worldwide.

Combining forensic-quality fingerprint capture, rapid dual iris scan capability and innovative facial capture technology, Cross Match's SEEK II is a comprehensive, multimodal identification and enrolment platform. The compact, portable solution is designed for rugged field use, making it quick and easy for law enforcement, first responders, military, border control and US government agencies to identify subjects and verify their identities in the field.

Lookout Collector rapidly extracts and captures facial images from video footage and surveillance tapes at up to 25 frames per second. If multiple faces enter the field of vision, it automatically records them. With Lookout Collector, users are assured of receiving the visual information they need efficiently and reliably.

"Increased end-user awareness and ongoing advances in technology are helping shape better products and services. This year's Best Products and Services were nominated from all over the world." says Rake Narang, editor-in-chief, Network Products Guide. "SEEK II and Lookout Collector are bringing improvements in ease of use, speed and reliability in identity verification and surveillance."

"We are honoured that SEEK II and Lookout Collector have been recognized as the 2010 Best in Biometrics and Surveillance by the Network Products Guide" stated Uwe Richter, Senior Vice President Product Management. "We have an outstanding development organization and are committed to meeting our customer needs by providing them with the best products and services."
