- Law Enforcement
- Corporations
- Non-profit organizations
- Companies interested in community relations

Child Identification Solution

Fast, Easy, Inexpensive and Meaningful

Research has shown that it is critical for parents and police to have fingerprints, vital statistics and current photos on hand to use for comparison when a missing child is believed found.

Given the recent increase in high-profile child abductions, and the many more that go unpublicized, America is taking action. Law enforcement agencies, nonprofit organizations, and large and small corporations are providing their time, resources and attention to the children in their communities—preventing child abductions and expediting the retrieval of children who are lost or abducted.

The Cross Match Child Identification Solution offers everything necessary for a comprehensive child safety community relations program. In fact, with the power of a ten-print fingerprint scanner and software, communities will be able to process children three times as quickly and with considerably better image quality than with traditional ink and paper or single fingerprint scanners. When it comes to child safety community relations, there is nothing more rewarding than providing comprehensive ID cards, with photos, fingerprints and demographic data to the community. Parents love it and are extremely grateful, which reflects positively on the organization providing the fingerprinting and ID service. Children particularly enjoy the identification process—getting their pictures taken and seeing the images of their fingerprints on a computer screen.

Providing good community relations, with a focus on child identification and safety, is the best place for corporations or law enforcement agencies to commit their charitable time and resources. Police departments, nonprofit and company personnel can feel good about what they are doing, while generating very positive public awareness of their brand identity.

Child Identification Solution

Features & Benefits

User friendly

Microsoft Windows software platform with simplified user interface. Child demographics information is easily entered using the Cross Match Child Identification application.

Electronic data

Computer generated ANSI/NIST compliant electronic fingerprint transaction (EFT) file with fingerprints, photograph and demographic data can be saved to a CD and uploaded by police departments in the event of an emergency.

Easy Set-Up

Simple, self-installable system, complete with a manual and customer support.

Quality Checks

Built-in checks to ensure quality fingerprints are captured every time.

Components

The Cross Match Child Identification Solution is an integrated kit, available in the following configurations:

Basic Cross Match Kit

- Ten-print fingerprint scanner: Lightweight, durable, high-speed, high-volume fingerprint capture device
- Laptop computer
- Either IEEE 1394 cable or USB cable (PC to scanner)
- Cross Match Child ID software

- User manual
- 1 user-replaceable silicone capture surface pad
- 100 fingerprint cards ready for customized logo
- 90-day warranty

Deluxe Cross Match Kit

All of the items in the Basic Cross Match Kit, plus:

- Rugged, highly mobile carrying case for all of the components of the solution
- Digital USB camera with tripod
- 50 custom-labeled blank CDs to hand parents for fingerprint photograph and demographic file storage
- Color ink jet printer with cable

Child Identification Solution includes fingerprint scanner, digital camera, laptop, color printer and carrying case

Optional Cross Match Kit

A Cross Match Child Identification add-on product (software and accessories), both with and without a laptop, is available to existing users of Cross Match Live Scan Systems.

Specifications

Solution Weight (without case)

24 lbs (11 kg)

Power

115 VAC, 4.5 Amps

Minimum System Footprint

30" x 30" (762 mm x 762 mm)

Operating Temperature Range

41°F to 95°F (5°C to 35°C)

Humidity Range

10-90% non-condensing

Fast and easy ID creation

Simple four-step fingerprint capture process—even with the smallest children:

1. Left hand, four finger placement on glass platen surface
2. Right hand, four finger placement on glass platen surface
3. Left thumb placement
4. Right thumb placement
