### **Height Adjustable Cabinet**

*Integrated System for Tenprint  
and Palm Print Scanners*

Height adjustable console

The new Cross Match height adjustable cabinet addresses customer needs with improved ergonomics, added flexibility and an expanded feature set. The system accommodates all Cross Match Guardian tenprint scanners, as well as L SCAN 500P and L SCAN 1000PX palm print scanners.

Designed with law enforcement professionals in mind, the user control elements of the cabinet are arranged ergonomically. Capturing fingerprints, palm prints and textual data is an intuitive process that

takes just a few moments. Through thoughtful design, the cabinet helps to streamline the criminal booking process and enhance officer safety.

The system includes an integrated flat-screen monitor with optional touch screen functionality. The large monitor conveniently adjusts for optimal viewing and displays captured fingerprints in full resolution. Shatterproof glass protects the screen from impact damage.

The cabinet is designed to provide ample workspace for documents or peripherals, such as signature capture solutions, barcode scanners or additional input devices. Foot switch controls are conveniently located at the front of the cabinet for simplifying the capturing process.

An optional mounting bracket allows users to permanently install a video or still camera to capture mug shots in addition to scar, birthmark or tattoo images. A customizable system, the height adjustable cabinet delivers value, ease of use and high reliability.

# Height Adjustable Cabinet

## Specifications

### Component Integration:

- Cabinet is prepared to house a scanner, PC, UPS, keyboard; space on both sides of the scanner to hold smaller computer peripherals
